DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-6, 8-13 and 16-17 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by 4924356 (356).

Per claims 1, 8 and 16-17, 356 teaches a light guide plate for introducing light beams from a light source into a liquid crystal display, comprising: an incident surface for introducing light beams into the light guide plate [11 and side nearest to 12a]; an emitting surface for uniformly transmitting light beams out from the light guide plate [top surface]; a bottom surface opposite to the emitting surface for reflecting the light beams in directions toward the emitting surface [light guide inherently light off the surfaces]; and a color filter disposed on and adjacent to the emitting surface, the color filter comprising a color layer for a full color display [26r,g,b].

Per claim 2, 3 and 5, 356 teaches the color filter further comprises a black matrix having a lattice pattern [see figure 6 and shielding layer 13 which shields uv light],

Per claims 4 and 5, 356 teaches the color layer is formed by a plurality of color filter elements of red (R), green (G), and blue (B) arranged in a predetermined pattern [see figures 4-5.]

Per claim 6, 356 teaches the light guide plate of claim 4, wherein the color filter elements are arranged in a deltoid pattern, a striped pattern, or a mosaic pattern [see figures 4-5].

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person

Art Unit: 2871

having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 7 and 14-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over 356.

356 lacks a plurality of scattering dots formed on the bottom surface, for reflecting and scattering light beams in directions toward the light emitting surface and the light source is a cold cathode fluorescent lamp or a light emitting diode. However, it was well known to use diffuse dots to evenly distribute light emitted from the plate and reduce heat, respectively. *Accordingly, it would have been obvious to one of ordinary skill in the art at the time of invention.*

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
